In May 2016, Council adopted the DCL annual inflationary rate adjustment system for making annual adjustments to Amenity Share Contributions (Density Bonus Contributions). The annual inflation index is based on a blend of annual property value inflation (BC assessment net property values for the City of Vancouver) and annual construction cost inflation (Statistics Canada non-residential construction price index for Vancouver) and calculated using public, third-party data. The formula used to calculate the inflationary rate adjustment is as follows:

ANNUAL INFLATION ADJUSTMENT OF AMENITY SHARE COST AND AFFORDABLE HOUSING SHARE COST = (ANNUAL CONSTRUCTION INFLATION x 0.83) + (ANNUAL PROPERTY VALUE INFLATION x 0.17)

Rates are adjusted in accordance with this formula annually. The rate adjustment will be presented in a Report to Council every July, with new rates effective and enforceable on September 30 of every year.
